

SARYGA

STATISTICS & METHODOLOGY

Statistical expertise

to support
innovation in
healthcare

Making complexity simple

We support healthcare companies in clinical development, strategic decision-making, and regulatory interactions.

Scientific excellence

Expert support for the most complex study designs

Informed decisions

Reduce risks, guide your choices

Tailored solutions

Rigorous methods adapted to your specific needs

International recognition

100+ publications and active participation in major scientific conferences

OUR CORE EXPERTISE

Innovative clinical trial designs

- complex adaptive trials • platform, basket and umbrella trials • historical data • synthetic control arms

Advanced statistical models

- dose-response relationship • missing data • subpopulations • biomarkers • Bayesian approaches

Quantitative decision-making

- probabilities of success • benefit-risk assessment • evidence synthesis • portfolio evaluation

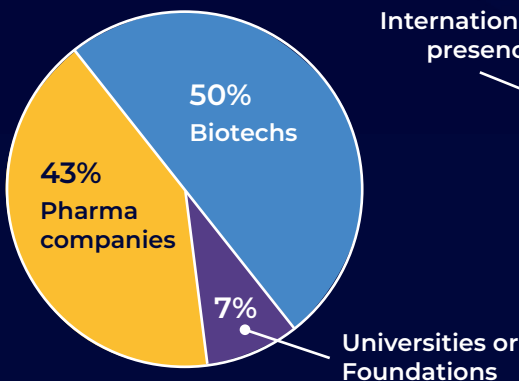

Regulatory and due diligence support

- data monitoring and steering committees • risk assessment • regulatory and HTA submissions

Training and interactive tools

- webinars • theoretical and practical training • RShiny applications • scientific communication

OUR CLIENTS

International presence

Universities or Foundations

SARYGA means :

- Making the right decisions
- Ensuring scientific rigor
- Adapting to complex environments
- Building meaningful partnerships
